River Mile: _____ Right or Left Bank?
KPB Parcel Number: _____
Closest Town: _____

Does any of this contact information change throughout the year? If so, please provide the dates on which you will be available at the different contact numbers.

What do you propose to do? Please describe the project in detail: What technique will you use (e.g. brush layering, cable spruce trees), include side view and top view drawings of the project as you envision it. Additional information such things as property boundaries, location of proposed and existing structures, dimensions of new structures, types of materials to be used, kinds of plants to be used in revegetation are all very helpful. Include color photos.

What is the estimated cost of this project?

Proposals must be received by September 1. Due to the high number of proposals, not all projects submitted will be funded. All applicants will be notified early in the following calendar year. If selected, an agreement with the USFWS will be required prior to all work. In addition, Federal, State, and/or local permits will be required depending on the type of project. You will be required to contact the Kenai River Center to initiate the permitting process. The signed agreement and all permits must be in hand before any work can begin.

I am interested in the cooperative bank restoration program and in obtaining matching funds for the Cost Share Program as described above.
